## WARNING!

\* Suspending any speaker cabinet can be dangerous and requires special care, safety rigging, and the use of appropriate hardware. Therefore Speakeasy and its authorized agents explicitly decline support or responsibility for such installations.

Whenever such installations are to be performed a structural engineer and other appropriate and certified professionals must be consulted.

Failure to do so may result in the cabinet falling and causing property damage, serious personal injury, or even death for which Speakeasy Vintage Music, Inc. and its agents will not be responsible.

Diagram is meant to demonstrate general connections only -- line mixer, power amp, rack case, stand, and cables are not included.
